* USDA Food Safety and Inspection Services advises all consumers to safely prepare their raw meat products, including fresh and frozen, and only consume ground beef that has been cooked to a temperature of 160°F. Other cuts of beef should be cooked to a temperature of 145 °F and allowed to rest for at least 3 minutes. The only way to confirm that ground beef or other cuts of beef are cooked to a temperature high enough to kill harmful bacteria is to use a food thermometer that measures internal temperature, <http://1.usa.gov/1cDxcDQ>.*
